Partners

Needs

- People with intellectual developmental disabilities (IDD) may have communication barriers that need to be overcome. This is a condition to promote their social inclusion.
- There is a need for training dedicated to professionals working with young people with IDD to help them support their communicative skills and overcome communication barriers.

General Objectives

- COM-IN aims to promote communicative skills in youth with intellectual developmental disabilities.
- COM-IN aims to guide and train professionals to better support persons with intellectual developmental disabilities' communicative skills.

Specific Objectives

- Conduct a survey among professionals in Europe to raise awareness in the needs to be trained to support communicative skills.
- Conceive training materials dedicated to professionals to support of communicative abilities in youth with IDD.

PROJECT RESULTS

1
Data collection and awareness-raising for the professionals in IDD in the needs to be trained.

2
Guides dedicated to professionals to support the development of Social Communicative Abilities.

3
Module training dedicated to professionals in IDD to support the development of Social Communicative Abilities.

4
MOOC dedicated to professionals to support the development of social communicative abilities in youth with IDD.
